GRAND LAKE ADVENTURES NEWFOUNDLAND, CANADA

MOOSE HUNTING!

Newfoundland is home for the Eastern Canadian Moose and we have the highest moose population per square mile than anywhere in North America. Trophy Eastern Canadian Moose are bulls from 40-55 inches, in fact 40-50 inch bulls are quite common. Calling is our main method while hunting during prime time hours and then using high vantage areas to spot and glass animals during mid-day. Our success rate is 99% for Moose.

WOODLAND CARIBOU HUNTING!

Woodland caribou hunting is a unique experience. In fact, Newfoundland is the only place in the world where this magnificent species can be legally harvested. The herd does not have a large migration pattern and you have the right conditions for a successful hunt! These conditions have helped to preserve our 100% success rate. Our area also has its share of caribou in both the Boone and Crockett and Pope and Young record books.

BLACK BEAR HUNTING!

Newfoundland has some of the biggest Black Bears in North America. Our mature bears will average 300lbs and we've taken them up to 500lbs. We offer both Trophy Spring Black Bear hunts and in the fall as an option to add to either a Moose or Caribou hunt. We host just a few hunters each season and we only take a few bears out of our hunting area. With little hunting pressure on our bears we are able to be selective while seeing high numbers of bears. We boast a high success rate with very high trophy potential.
